

UL891 Switchboards

Custom low-voltage power distribution

Configure a switchboard lineup around your service, protection and distribution requirements. Atlas combines modular sections with application-specific bus and device layouts.

Configuration features

- Pull, utility, main and distribution sections
- ACB main protection with SPD and metering options
- MCCB distribution with breaker and provision positions
- 36-inch and 46-inch standard section widths
- 90-inch height and 30-inch depth in the online designer
- 46X and 66X distribution interiors
- Indoor and outdoor configurations

Plan your lineup

- Specify system amperage, voltage and kAIC
- Select top or bottom feed
- Define main protection and feeder schedule
- Reserve space for future distribution devices

Illustrative installation

Online layouts are preliminary. Final ratings, dimensions and construction are confirmed by Atlas engineering.
